                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Title:
Perfect score:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Total number of hits satisfying chosen parameters:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Searched:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Database :
                                                                                                                                                                                                                                                                                                                                                                                                                                              Result
                                                                                                                                                                                                                                                                                                                                                                                                                                  <u>₹</u>
  Pred. No. 1s the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

C; Comment: The source of this protein is ovarian follicular fluid.
C; Comment: The mature protein is the carboxyl-terminal segment of a precursor polypeptid lifterent forms of inhibin have been isolated (A and B) that differ in the amino-terminal C; Comment: Inhibin is secreted by ovaries or testes and inhibits the secretion of follit

C; Comment: The source of this protein is ovarian follicular fluid.
C; Comment: The mature protein is the carboxyl-terminal segment of a precursor polypep ifferent forms of inhibin have been isolated (A and B) that differ in the amino-termi C; Comment: Inhibin is secreted by ovaries or testes and inhibits the secretion of fol C; Superfamily: inhibin
C; Keywords: contraceptive; follitropin inhibitor; glycoprotein; gonad

submitted (APR-1999) to the EMBL/GenBank/DDBJ databases.
-:- FUNCTION: INHIBINS AND ACTIVINS INHIBITY AND ACTIVATE,
-:- FUNCTION: THE SECRETION OF FOLLITROPIN BY THE PITUITARY GLAND.
INHIBINS/ACTIVINS ARE INVOLVED IN REGULATING A NUMBER OF DIVERSE FUNCTIONS SUCH AS HYPOTHALAMIC AND PITUITARY HORMONE SECRETION,
GONADAL HORMONE SECRETION, GERM CELL DEVELOPMENT AND MATURATION,
ERYTHROID DIFFERENTIATION, INSULIN SECRETION, NERVE CELL SURVIVAL,
EMBRYONIC AXIAL DEVELOPMENT OR BONE GROWTH, DEPENDING ON THEIR
SUBGURIT COMPOSITION. INHIBINS APPEAR TO OPPOSE THE FUNCTIONS OF
                                                                                                                           SEQUENCE

-I- FUNCTION: INHIBINS AND ACTIVINS INHIBIT AND ACTIVARY GLAND.

RESPECTIVELY, THE SECRETION OF FOLLITROPIN BY THE PITUITARY GLAND.

INHIBINS/ACTIVINS ARE INVOLVED IN REGULATING A NUMBER OF DIVERSE FUNCTIONS SUCH AS HYPOTHALAMIC AND TUTUITARY HORMONE SECRETION,

GONADAL HORMONE SECRETION, GERM CELL DEVELOPMENT AND MATURATION,

ERYTHROID DIFFERENTIATION, INSULIN SECRETION, NERVE CELL SURVIVAL,

EMBRYONIC AXIAL DEVELOPMENT OR BONE GROWTH, DEPENDING ON THEIR

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Mason A.J., Niall H.D., Seeburg P.H.;

"Structure of two human ovarian inhibins.";

Blochem. Blophys. Res. Commun. 135:957-964(1986).

-I- FUNCTION: INHIBINS AND ACTIVINS INHIBIT AND ACTIVATE,

-RESPECTIVELY, THE SECRETION OF FOLLITROPIN BY THE PITUITARY GLAND.

INHIBINS/ACTIVINS ARE INVOLVED IN REGULATING A NUMBER OF DIVERSE
FUNCTIONS SUCH AS HYPOTHALAMIC AND PITUITARY HORMONE SECRETION,

GONADAL HORMONE SECRETION, GERM CELL DEVELOPMENT AND MATURATION.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         01-MAR-1989 (Rel. 10, Created)
01-OCT-1996 (Rel. 34, Last sequence update)
16-OCT-2010 (Rel. 40, Last annotation update)
Inhibin beta B chain precursor (Activin beta-B chain).
